PROFESSIONAL SPRAY GUN

MADE IN ITALY

Electrostatic Disinfection Technology

Ideal for distributing sanitising solutions

E-Spray is a professional gun sprayer that uses the principle of electrostatic induction to distribute disinfectant solutions effectively and uniformly on surfaces.

E-Spray is lightweight and very comfortable, powered by a lithium battery that allows you to carry out decontamination spraying for several hours, freely and anywhere, without being tied down by a cable. The solution is sprayed in very small, light drops, which reach every point of the area to be treated and settle effectively. The electrostatic charge attracts the drops to the targeted surface where they create a sanitising coating.

1
The electrostatic applicator provides an electrical charge to the sprayed solution

How does it work?

Electrostatic technology allows quick and even surface coverage with a sanitising solution.

The electrostatic applicator provides an electrical charge to the solution. The charged molecules repel each other, so they keep an even distance from each other but, at the same time, they are attracted to the surface to be treated.

This attraction ensures that all the particles of the solution settle on the surface, creating a 360-degree coverage, without leaving out any areas.

2

Charged particles are attracted to the surface

3

Surfaces are reached and coated by the micronised solution

4

Each surface is evenly covered with the micronised solution

The strength of the charged particles is greater than that of gravity, so they are immediately attracted by the surface and do not fall to the ground.

Why do you need E-Spray?

Germ and bacteria are very quick to spread and settle in tight corners and hidden spots.

Disinfecting effectively by hand takes a very long time and costs can be prohibitive.

In addition, there are many areas that are difficult to disinfect properly, such as computer keyboards and telephones in offices, or checkouts in supermarkets or shops.

CONVENTIONAL SPRAY

Liquid distribution is localised

ELECTROSTATIC TECHNOLOGY

The solution is evenly distributed over the entire surface, providing a 360-degree coverage which increases the quality of disinfection.

Advantages

An electrostatically charged spray can reach the entire targeted area evenly, right down to the most hidden points. The cloud of charged particles completely envelops the surface and sanitises every part of it.

SUITABLE FOR MANY APPLICATIONS

- Several nozzles are available to create drops of different sizes, according to needs and applications
- The small size allows the operator to sanitise small rooms such as bathrooms or offices

DISINFECTION QUALITY

- The sprayed solution adheres quickly to all surfaces, even curved ones, does not create agglomerated droplets and reaches even hard-to-access areas.
- The solution is micronised into small particles, which dry quickly and do not wet the surfaces or create drips
- Improved customer experience, reassured by a hygienically treated environment

DISINFECTION TIME

- Quick distribution of solution guarantees time saving
- Micronization saves sanitizing solution, up to 65%, so that hygienization can be performed for longer time

OPERATING AUTONOMY

- Thanks to lithium batteries, it can sanitize up to 6 hours* continuously
- The spare battery doubles operation time

COMFORTABLE

- Lightweight and comfortable to use, does not tire the operator who can keep working for several hours

SAFETY

- E-Spray allows you to perform decontamination processes required by current regulations on workplace safety
- Reduces the risk of cross-contamination between surfaces

INCREASED PRODUCTIVITY

- It has a positive impact on absenteeism in the workplace and on the overall healthiness of the facility.

NOZZLES

40 µm particles
(22' of autonomy)

80 µm particles
(12' of autonomy)

100 µm particles
(8' of autonomy)

Tank 1 litre

Antibacterial plastic

STANDARD EQUIPMENT

- Lithium battery (18V / 2Ah)
- Battery charger (18V / 2A)
- Nozzles kit
- Shockproof kit box

ACCESSORIES

Lithium battery (18V / 4Ah) to increase working autonomy

Long Range backpack with additional 2-litre tank

DIMENSIONS AND TECHNICAL DATA

TECHNICAL DATA		E-SPRAY
Productivity theoretical	up to sqm/h	350
Solution tank	l	1
Nozzle shape		Full cone
Particle size	µm	40 / 80 / 100
Flow rate	ml/min	45 (Nozzle for 40 µm particles) 77 (Nozzle for 80 µm particles) 138 (Nozzle for 100 µm particles)
Tank autonomy	min	22 / 12 / 8
Solution pump	W	20
Power supply	V	18 V Li-ion Battery 2000 mAh (Standard) 18 V Li-ion Battery 4000 mAh (Optional)
Battery charger	V	18 V 2000 mA (Standard)
Battery run time	up to h	6
Dimensions (L x h x w)	mm	417 280 90
Spray gun weight empty without battery	kg	1,3
Spray gun weight with battery	kg	1,7
Spray gun weight ready to use	kg	2,7

RECOMMENDED APPLICATIONS

OFFICE

- Meeting rooms
- Restrooms
- Workstations (desks, chairs)
- Furniture
- Refreshment areas (coffee machines, vending machines, coffee tables)
- Access/exits: handles, grab bars, handrails, elevators
- Counters and furniture in public spaces

TRANSPORT

- Passenger seats
- Handles, doors, bars, buttons
- Restrooms
- Luggage drop-off areas
- Overhead lockers and storage areas
- Validating machines
- Meeting rooms
- Classroom/ auditorium seats

HO.RE.CA

- Rooms
- Restrooms
- Waiting rooms
- Counters
- Seats
- Furniture

FACTORIES

- Workbenches
- Locker rooms
- Restrooms
- Counters and welcome areas for suppliers/ customers

CONSTRUCTION SECTOR

- Work vehicle cabins
- Company cars
- Locker rooms
- Restrooms
- Refreshment areas

EDUCATION

- Desks and furniture
- Toys and equipment
- Doors and handles
- Restrooms
- Waiting rooms
- Counters
- Locker rooms
- Classrooms
- Offices and workstations
- Relax zones
- Meeting rooms
- Classroom/ auditorium seats

RETAIL (NON-FOOD)

- Customer areas (dressing rooms, treatment rooms, waiting rooms)
- Goods and shelves
- Workstations (cash registers, counters, furniture)
- Restrooms

WELLNESS

- Equipment
- Locker rooms
- Waiting rooms
- Relax zones
- Treatment rooms
